Fresher Python Jobs in Bangalore: Openings and Referral Plan

Prepared 2 November 2026 for a Python / Django / backend fresher (0–2 years), Bangalore preferred.

Summary

I found 8 openings, not 10, and only 3 are firmly confirmed as recent and live. I stopped at 8 because filling the last two would have meant padding the list with stale or unverifiable postings. I also found no verifiable recruiter name, LinkedIn URL or email for any of them.

How each job was verified

- ✅ **Confirmed recent:** a source page that cites the official requisition ID and a posting date of 27–29 Oct 2026. I couldn't open the company's own application page, so click through to confirm each one is still open.
- 🟡 **Lead only:** listed on a job board, but the posting date is old or missing, so it may no longer be open.

Section 1: Job details

#	Company	Title	Location / Mode	Experience	Salary	Posted	Status
1	LSEG (FTSE Russell)	Associate Software Engineer (R0124079)	Bengaluru, Divyasree Technopolis / mode not stated	No years stated; internships and projects accepted	Not disclosed	29 Oct 2026	✅
2	TransUnion	Associate Software Engineer (Req 19042895)	Bengaluru / Hybrid (2+ office days)	0–2 yrs	Not disclosed (Glassdoor reports ₹7–9 LPA, small sample)	29 Oct 2026	✅

#	Company	Title	Location / Mode	Experience	Salary	Posted	Status
3	Cisco	Software Engineer, cloud applications (Job 2028048)	Bengaluru / Hybrid	0–2 yrs (Bachelor's)	Not disclosed	27 Oct 2026	✅
4	Cisco	Software Engineer, Evergreen (Job 2015359)	Bengaluru plus 11 cities / Hybrid	0 yrs	Not disclosed	10 Sep 2026	🟡
5	Accuris	Associate Software Engineer	Bengaluru / Hybrid (2 days)	Fresher	Unclear (Built In shows "100K–300K", unit unstated)	Reposted about 22 days before the page was indexed	🟡

- **DemandPay:** listed on Glassdoor only; no direct link found.

Company careers pages

careers.cisco.com for Cisco. For LSEG and TransUnion, use the Careers section of each company's website, or the Workday boards linked above. I didn't verify a deeper careers URL for Accuris, Urban Vault or DemandPay.

Role summaries and fit

1. **LSEG.** Python is the main language, but Java, C#, Go and similar are accepted if you're willing to learn Python. The work is on the FTSE Russell index data platform, and SQL, Git and basic REST are expected. This is your best match: Python-first, with no experience minimum stated.
2. **TransUnion.** An entry-level full-stack role where any one of Java, JavaScript/TypeScript or Python is accepted. Internships and projects count as experience, and React, Spring Boot and Spark are only nice to have. The day-to-day work leans Java, so the Python fit is moderate. Apply to both requisitions.
3. **Cisco 2028048.** Builds cloud applications and needs DSA, one of C/C++, Java, Python or Golang, and distributed-system design. It is a stretch for a pure fresher, so expect tough screening.
4. **Cisco 2015359.** A general 0-year posting that carries an "Evergreen" tag, which can mean slow replies. Treat it as a backup.
5. **Accuris.** A fresher role with basic Python, Java or Angular, 60% aggregate required, and a minimum two-year commitment.

6. **Urban Vault.** Wants a junior full-stack developer with Python (Django) and React.js, for 0–1 years. It is the closest match to "Python Full Stack", but I can't confirm it is still open.
7. **Covlant.** A remote Bengaluru role for current or recent grads, with a 2–6 month stipend and an immediate start. It is an internship, so it is only useful as a remote foot in the door.
8. **DemandPay.** A Python and Next.js full-stack internship in Bengaluru, with Golang or FastAPI as a bonus. I couldn't date it.

Sections 2 and 3: Recruiter details and referral analysis

Recruiter, HR, hiring manager, LinkedIn URL, company email format, recruiter email, HR email: Not Publicly Available, for all 8 openings. The one TransUnion talent-acquisition profile I found (Divya Munvar, via a third-party site) showed her TransUnion tenure ending in 2022, so I didn't use it.

#	Best person to contact	Why they're most likely to respond	Referral probability (my estimate)
1 LSEG	A Python engineer on the FTSE Russell or index-data team, 1–3 years in	Junior engineers get referral bonuses and remember the fresher hiring process	Medium
2 TransUnion	A TruAudience engineer in Bengaluru, or a campus recruiter	The same team posted two twin requisitions, so it is hiring in volume	Medium
3–4 Cisco	A Bangalore Cisco engineer with a similar graduate profile	Cisco has a formal referral system, and these requisitions sit outside the Workday search, so a referral helps visibility	Medium for 2028048, Low for the Evergreen role
5 Accuris	A Bengaluru engineer or HR contact there	It is a small team, and a reposted job suggests it is still hiring	Medium

#	Best person to contact	Why they're most likely to respond	Referral probability (my estimate)
6 Urban Vault	A founder or engineering lead	It is a mid-size company, and direct outreach is realistic	Medium
7–8 Covlant, DemandPay	The founder or engineer who posted it	Internship roles are filled quickly	Low (full-time conversion only)

I couldn't verify who these people are. To find them on LinkedIn, search "[company] Bengaluru Python software engineer" for engineers, and "[company] campus recruiter India" for recruiters.

Rankings

- **A. Easiest for freshers:** LSEG, TransUnion, Accuris.
- **B. Highest growth:** I can't rank this, because I didn't collect verified headcount-growth data.
- **C. Remote:** Only Covlant (internship). I found no remote full-time role that fits.
- **D. Most likely to give referrals:** LSEG, TransUnion, Cisco. This is my inference from their size, not a verified referral program.
- **E. Recruiters to contact first:** There are no verified names, so go in this order: LSEG, TransUnion, then Cisco 2028048.

F. Referral message

Replace the brackets. I can't personalize it by recruiter name.

> Hi [Name], I'm a [degree] graduate with Python/Django and SQL projects ([GitHub link]). I saw [Company]'s Associate Software Engineer opening ([Req ID]) in Bengaluru and it fits my background closely. Would you be open to referring me, or to sharing what the team looks for? Resume attached. Thank you!

G. HR email template

Subject: Application for [Role] ([Req ID]), Python Developer, [Your Name]

Dear [Name],

I'm a [year] [degree] graduate who has just applied for [Role] ([Req ID]) at [Company]. My experience includes [one Python/Django project with an outcome], SQL, and REST APIs. I'd welcome a chance to discuss how I can contribute. My resume and GitHub are attached.

Regards, [Name] | [Phone] | [LinkedIn]

H. 24-hour action plan

1. **First 2 hours:** Apply on LSEG, both TransUnion requisitions and Cisco 2028048. Confirm each one is still open as you go.
2. **Hours 2–6:** Find 2–3 Bengaluru engineers at each company on LinkedIn and send the message in section F.
3. **Hours 6–10:** Apply to Accuris and Urban Vault, and check whether they are still live.
4. **Hours 10–24:** Tidy your GitHub (two Python projects with READMEs), then send follow-ups.
